

AMERICAN BEAUTIES NATIVE PLANTS® for Native Birds

Native plants are essential for native birds to survive and thrive. Native plants have evolved with native birds and provide three vital elements that non-native plants can't.

Caterpillars (C) - Essential live food for rearing of young

Fruits & Seed (FS) - Essential food when live food sources are not always available

Cover (CV) - Essential predator protection and nesting sites to raise young

shadblow serviceberry

Amelanchier (T C FS CV)

New England aster

Aster novae-angliae (P C FC)

buttonbush
